

PLATINUM  PERFORMANCE™
SYNTHETIC FLUSHING OIL

DSI Platinum Performance Synthetic Flushing Oil is a pure synthetic lubricant, solvent and cleaner designed to clean and dissolve varnish and deposits in your equipment. It dissolves sludge from compressors, engine crankcases and transmissions while the equipment is still operating. **DSI Platinum Synthetic Flushing Oil** is mixable and compatible with synthetic and petroleum lubricants.

DSI Synthetic Flushing Oil is often used when converting from petroleum to synthetic lubricants. This cleaning process will remove carbon deposits, varnish and sludge from your equipment, and will help get the best performance from your new synthetic oil.

Simply add 10% by volume of **DSI Synthetic Flushing Oil** to the existing lubricant and operate your equipment

For maximum benefit, use **DSI Platinum Performance Synthetic Flushing Oil** at every oil change.
