

PLATINUM PERFORMANCE™

SYNTHETIC AUTOMATIC TRANSMISSION FLUID

DSI Platinum Performance Automatic Transmission Fluid is a synthetic ATF designed for extreme conditions. With DSI's exclusive Cobalt Protection System®, **Platinum Performance ATF** keeps your equipment clean and working smoothly, even under heavy load or in prolonged high temperature use. It uses the highest quality synthetic PAO and ester base oils, blended with DSI's patented Cobalt Protection System additives, which have been proven superior in reducing heat, wear, oxidation, and rust.

Platinum Performance ATF is recommended for use in all types of Automatic Transmissions. It resists oxidation, wear, and corrosion better than ATF made with petroleum or lower quality synthetic oils. **Platinum Performance Synthetic ATF** is compatible with all standard seals and materials used with petroleum oils.

APPLICATIONS

- ❖ **PLATINUM PERFORMANCE ATF** is recommended for use in all automatic transmissions that use Ford Mercon® or GM Dexron® III type fluids.
- ❖ Heavy Trucks
- ❖ Motorsports and Racing Applications
- ❖ Heavily loaded transmissions
- ❖ Equipment operating at high ambient temperatures

BENEFITS

- ❖ Extended Drain Intervals
- ❖ Smoother shifting
- ❖ Reduces Maintenance Costs and Downtime
- ❖ Excellent High Temperature Protection
- ❖ Protects Automatic Transmission pumps against wear and corrosion
- ❖ Compatible with Automatic Transmission system seals

Viscosity @ 40° C	33 cSt.
Viscosity @ 100° F	7.1 cSt.
Flash Point, °F	465
Turbine Oil Stability Test, ASTM D943	10,000+ Hrs. to NN 2.0
Oxidation Stability Test, RBOT ASTM D2272 ...	1,700 Minutes
Copper Corrosion Test D30, 24 hrs @ 121C ...	1B
